DBEH 700 Families, Systems, and Health  
DBEH 702 Mind, Body, and Behavior  
DBEH 705 Teaching and Supervision  
DBEH 710 Behavioral Health Program Development and Evaluation  
DBEH 712 Leadership and Administration of Behavioral Health Programs

Our DBH Program is designed to prepare behavioral health and other healthcare professionals for successful careers in integrated healthcare. Through our innovative curriculum, students will acquire relevant knowledge and develop the practical skills necessary for effective communication and collaboration with interprofessional healthcare teams to deliver comprehensive services to patients and their families. Students will also be equipped with the knowledge and skills to provide effective wellness services for healthcare professionals and develop comprehensive workplace wellness programs. With an emphasis on preparing leaders in integrated behavioral health, graduates of this program will be well-equipped to develop, implement, and effectively lead integrated behavioral health programs in a variety of medical settings.
